

New NSC Lift Truck Operator Program!

We are proud to announce our brand-new Lift Truck Operator Training Program that incorporates the very latest in safety content and learning principles. This comprehensive, OSHA-compliant program covers everything from order pickers to side loaders to rough terrain. Any operator—novice to seasoned veteran—will benefit from this course.

Our one-day Instructor Development Course will make you comfortable and confident in teaching the 7 instructional modules that lift truck operators need to be safe, skilled, and productive. The easy-to-follow Facilitator's Guide with companion DVD is included in the \$495 (member) course tuition; additional instructor candidates are only \$150. High-definition videos and detailed animations of real-life working conditions help make this forklift training the most effective available in today's marketplace. The program is complete with full-color Participant Workbooks that are packed with interactive activities, charts and checklists. Instructors will award the National Safety Council Certificate and wallet card upon successful completion.

The Safety and Health Council of North Carolina invites you to a ***Free Preview over Breakfast*** of the NSC Lift Truck Operator Program. Register today for a session at our Charlotte or Raleigh offices:
