

Superior Training to Improve CPR and AED Skills Retention

Bystander CPR, provided immediately after cardiac arrest, can **double** a victim's chance of **survival**.

CPR and AED

This 3¼-hour CPR and AED course prepares the layperson to respond to choking, breathing and cardiac emergencies — and how to use an Automated External Defibrillation unit in conjunction with CPR. The course follows the latest CPR and Cardiac Care guidelines using a combination of instructor, Video-Self-Instruction (VSI) and hands-on training.
